

SHIVAM SINGH.

— STAFF SOFTWARE ENGINEER

LOC Bengaluru, India MAIL singhshivam071093@hotmail.com IN linkedin.com/in/sks71093 GH github.com/sks710931

Staff Software Engineer focused on secure, scalable distributed systems. Core stack is .NET / C#, React / TypeScript, and Azure, across application architecture, identity, event-driven systems, and enterprise software that has to stay maintainable as it grows.

/* ENGINEERING PRINCIPLE */

Good architecture is not about more abstraction. It is about systems that stay secure, reliable, and understandable when they grow.

02 / CAPABILITIES

MODULE_01

Application & system design

Service boundaries, asynchronous workloads, and decisions that stay readable later.

Distributed systems Architecture Event-driven Stateful workflows

MODULE_02

Identity & security

Auth that works across cloud and customer-hosted environments.

OAuth 2.0 / OIDC OpenIddict TPM identity App security

MODULE_03

Product engineering

Full-stack delivery with resilient APIs and practical interfaces.

.NET / C# React / TypeScript SQL Server REST APIs

MODULE_04

Cloud & delivery

Messaging, containers, and the operational side of enterprise apps.

Azure Service Bus Redis Docker / CI/CD

04 / ENGINEERING FOCUS

01 / SECURITY

Identity built on trust.

OAuth/OIDC, OpenIddict, and hardware-backed device identity using TPM.

02 / DISTRIBUTED

Asynchronous by design.

Service Bus, workers, long-running sessions, callbacks, and stateful processing.

03 / CLOUD

Across the boundary.

Cloud infrastructure connected to customer-hosted environments, with reliability in mind.

03

/

EXPERIENCE

APR 2026 — PRESENT

CURRENT

Staff Software Engineer

Gleason Corporation

Bengaluru

Architecting secure distributed applications across .NET, React, and Azure. Leading identity and application-security design, including OAuth 2.0/OIDC, OpenIdDict, and TPM-backed device identity, plus asynchronous workers and stateful workflows. Technical direction through architecture and code reviews. AI-assisted engineering only where it stays deterministic and reviewable.

AUG 2021 — MAR 2026

Senior Software Engineer

Gleason Corporation

Bengaluru

Delivered enterprise software across frontend, APIs, databases, and Azure. Built Service Bus workflows with SQL Server, Redis, and containers. Tightened service boundaries and CI/CD with Azure DevOps, Docker, and Azure Container Registry.

JUL 2020 — SEP 2025 · PARALLEL

Solidity Developer

Freelance

Solidity contracts, integration patterns, and blockchain proof-of-concepts alongside full-time work.

NOV 2019 — AUG 2021

Software Engineer

DealerSocket

Bangalore

Full-stack work on Blackbird CRM for automotive dealerships. React, Angular, TypeScript, .NET, and .NET Core.

SEP 2017 — NOV 2019

Associate Software Engineer

Allscripts

Bengaluru

Turned requirements into designs and features, with unit tests, code reviews, release support, and technical spikes.

OCT 2016 — AUG 2017

Intern

Allscripts

Bengaluru

Development support, debugging, unit testing, documentation, and proof-of-concept work.
