

SHIVAM SINGH.

STAFF SOFTWARE ENGINEER

NAME Shivam Kumar Singh LOC Bengaluru, India · Remote TEL +91 8840330669 MAIL singhshivam071093@gmail.com
IN linkedin.com/in/sks71093 GH github.com/sks710931

Hands-on application architect with nearly ten years building enterprise products. Progressed from full-stack implementation to technical direction across industrial SaaS, centralised identity, software licensing, and governed AI. Promoted to Staff Engineer at Gleason after taking cross-product responsibility. Leads five engineers and still does the design, the implementation, the reviews, and the hard debugging.

/* ENGINEERING PRINCIPLE */

Shared platforms beat one-off implementations. The person who designed the boundary should still be able to debug it.

02 / CAPABILITIES

MODULE_01 Application architecture API boundaries, platform services, and desktop-to-browser modernisation.	MODULE_02 Identity & security SSO, OIDC with PKCE, OpenIdDict, MFA, and passkeys.
MODULE_03 Product engineering C# / .NET, React, Redux, Entity Framework Core, SQL Server.	MODULE_04 Cloud, data & AI Azure, Redis, Docker, governed agents, MQTT, and SAP.

GLEASON · STAFF, APRIL 2020 — PRESENT

Technical direction, still hands-on.

Senior Software Engineer, August 2021 — March 2026, before the promotion. Bengaluru · Remote.

- › Lead five engineers across engineering SaaS, licensing, identity, and AI.
- › Define boundaries between React, .NET, SQL Server, Redis, identity, and containers.
- › Turn domain requirements into API contracts, epics, and independently deliverable work.
- › Replace product-specific auth and licensing with services more than one application can use.

04 / SELECTED PLATFORMS · GLEASON

01 / INDUSTRIAL SAAS

KISSsoft, in the browser.

KISSsoft supports standards-based design, optimisation, and verification of machine elements. Desktop-oriented workflows moved to React, Redux, ASP.NET Core, Entity Framework Core, and SQL Server. REST contracts keep calculation services behind the browser. The shared Gleason identity platform replaced a product-specific login with application-scoped authorisation.

React · TypeScript · Redux · ASP.NET Core · EF Core · SQL Server · Docker

02 / LICENSING

KISSsoft License Manager.

Cloud licensing for floating and standalone licences, entitlements, usage, and administration. Fast-changing runtime state sits in Redis. Customers, entitlements, and configuration sit in SQL Server. Desktop and cloud clients share acquisition, validation, allocation, and release, with Blazor for administration.

C# · ASP.NET Core · Blazor · EF Core · SQL Server · Redis · Docker

03 / IDENTITY

Enterprise authentication and SSO.

AuthServer is the shared authority for Gleason applications. Browsers use OpenID Connect authorisation code with PKCE. Services use OAuth 2.0 client credentials. Users, applications, roles, and claims are consolidated. Hardening includes email OTP, TOTP, trusted devices, Redis rate limits, audit, WebAuthn/FIDO2 passkeys, and Azure Key Vault.

.NET 9 · OpenIddict · OIDC · EF Core · Redis · Key Vault · WebAuthn · Docker

04 / GOVERNED AI

GEMS — agents with a human gate.

I work closely with the Principal Architect on GEMS AI for industrial operations. Approval gates, resource controls, immutable audit, independent review, and recovery for long-running workflows. A service-generation pipeline supports deterministic, interactive, and autonomous modes. SAP OData and MQTT/Mosquitto connect enterprise data with the shop floor. Unit and integration tests cover the platform and generated services.

.NET 8 · Microsoft.Extensions.AI · MQTT · PostgreSQL · pgvector · SAP OData · xUnit

03 / EARLIER

NOV 2019 – AUG 2021

Software Engineer I

DealerSocket, a Solera company · Bengaluru

- › Automotive CRM across React, TypeScript, Angular, C#, ASP.NET Web API, Web Forms, VB.NET, and SQL Server.
- › Moved important features to React while older Web Forms modules stayed integrated.
- › Scrum Master for planning, refinement, and reviews. Star of the Month more than once.

OCT 2016 – NOV 2019

Associate Software Engineer

Allscripts Healthcare Solutions · Bengaluru

- › Practice-management workflows in C#, VB.NET, VB6, T-SQL, SQL Server, and Crystal Reports.
- › Modernised selected paths with React, Angular, .NET Core, Docker, and Azure SQL.
- › Trained engineers on Azure, Web APIs, Entity Framework, and Angular. Spot Award, CLEAR Award, Innovation Champions Club.

STACK

LANGUAGES

C#, TypeScript, JavaScript, T-SQL

FRONTEND

React, Redux, Angular, TypeScript

DATA

SQL Server, Azure SQL, PostgreSQL, Redis, pgvector

AI / INDUSTRIAL

Governed agents, MQTT, Mosquitto, SAP OData

BACKEND

.NET 8/9, ASP.NET Core, OpenIddict, EF Core, Blazor

IDENTITY

OAuth 2.0, OIDC, PKCE, JWT, MFA, WebAuthn

CLOUD

Azure, Key Vault, DevOps, ACR, Docker, App Insights

EARLIER

VB.NET, VB6, Web Forms, Crystal Reports
